The TD-922 is a belt-drive analog turntable with a stylish and luxurious chassis containing an MM Phono preamplifier and USB output. The TD-922 offers Phono and Line output, which allows you to play vinyl to any amplifier that isn't equipped with Phono input.

Using Audio-Technica's MM cartridge, the TD-922 lets you enjoy high accuracy tracking sounds as soon as you set up.

It includes a Bluetooth® transmitter (Apt-X®, AAC, SBC), allowing you to play music from your TD-922 to any active Bluetooth® speaker or system.

The sound of the record is converted to digital (up to 48 kHz/16-bit). Recording on a computer is possible by connecting this to a USB port on the computer using a USB cable.

The Auto-Stop function allows the disc to stop turning when the arm reaches the end of vinyl playback.

The TD-922 is the perfect turntable for any music lover, from first time users to audiophiles, who appreciates high quality sounds for nowadays uses.
